(54) Title: **ADAPTIVE CLOSED GROUP CARICATUREING**

(57) Abstract: A method and system for generating caricatured images of subjects wherein the caricatured image of each subject is adapted when subjects join and leave a closed group of which they are members. By adapting the caricatured images in this manner, it can be ensured that each caricatured image remains maximally distinguishable from the other images in the group, thus ensuring that recognition of the images may be maintained at a high level.
